

# LEAD AUDITOR INTEGRATED MANAGEMENT SYSTEMS (IMS)

## ISO 9001, ISO 14001 & ISO 45001 (EXEMPLAR GLOBAL CERTIFIED)

Duration: 6 Days

### PROGRAM OVERVIEW

In today's business world, with increased stakeholder interest in a company's quality, environmental health and safety (EHSQ) performance record, the scope of auditing is expanding to incorporate quality, environmental and occupational health & safety issues. Auditing programs today need to adopt an integrated approach to provide information on the effectiveness of integrated management systems and identify opportunities for cost reduction and continual improvement.

### LEARNING OBJECTIVES

- Understand the ISO 9001, ISO 14001 and ISO 45001 standards to design an integrated management systems
- Apply integrated audit tools to verify that a management system is operating effectively and efficiently using standard ISO 19011
- Optimise audit resources and avoid duplication in the integrated audit process
- Perform an audit of an integrated management system to standards acceptable to third party certification.
