# **ORGANIZATIONAL GREEN HOUSE GASES (GHG) ACCOUNTING AND REPORTING (ISO 14064 & GHG PROTOCOL)**

- Have you thought about the way your organization manage its greenhouse gas (GHG) emissions? Are you ready ready to cope with increasing demands for ESG?
- This training is designed to provide participants with essential understanding of carbon accounting approaches and methodologies based on ISO 14064 and the GHG Protocol: Corporate Accounting and Reporting Standards. These standards besides have formed the basis of many local and international schemes, they also provide tools for industries and governments in developing their programmes to reduce greenhouse gas (GHG) emissions.

## **TARGET AUDIENCE**

- Applicable to any organization, such as industries, NGOs, government agencies, local governments and universities, involved in the development, implementation and management of GHG based on ISO 14064
- Applicable to individuals/personnel preparing a corporate-level GHG emissions inventory.

## **Programme outline:**

- Overview of ISO 14064-1 and the GHG Protocol, and the business application of organizational GHG reporting
- Overview of rules and boundaries for consolidating GHG emission accounting and reporting between organization and all parties involved
- GHG accounting on Scope 1, Scope 2
